WebHelp Full Version

The ABC User Training web site has a link to the ABC Online Help that brings up a WebHelp version of the ABC Online Help system. Therefore, the ABC Online Help is generated in the WebHelp full format and copied to the ABC User Training web site.

Note: You will need write access to the ABC User Training web site directories.

Step	Action
1	Generate the ABC Online Help in the WebHelp Full layout and save to your local drive.
2	Copy all the files in the folder to the following staging directory: **\\deploy.abccompany.com\training\abc-help**
3	Notify the Web Development Engineer and the Training Web Site Coordinator that the ABC Online Help has been updated and needs to be deployed to the ABC User Training web site.

The ABC Online Help site address on the ABC User Training Web site is:

http://abccompany.com/abc-help/abc_app_user_manual.htm

Last updated: 04-05-2012

This is a WebHelp example of WebHelp deployment instructions.
